PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building Python backend systems and AI applications. Currently working on production systems involving document processing, OCR, LLM workflows, and search. Experienced in debugging systems, testing AI outputs, and improving reliability.

EXPERIENCE

ALL MR ONLINE (NearLaw)

Feb 2026 – Present

AI Engineer Intern — Lexabase (AI-Powered Legal Search Platform)

Mumbai, India

- Developed Python-based components for a production legal search system processing **18M+ court records**, working across document processing, semantic retrieval, and LLM-based workflows.
- Designed asynchronous processing pipelines using worker queues and multi-stage LLM workflows for document ingestion, metadata extraction, indexing, and automated processing.
- Developed and tested OCR/PDF processing components for structured extraction, metadata generation, and searchable knowledge bases across varied document formats.
- Debugged and investigated failures across document and AI pipelines by reproducing issues, reviewing generated outputs, testing fixes, and iterating on implementations to improve reliability and processing efficiency.

Utkarsha Interiors

Oct 2025 – Dec 2025

Web Developer Intern (Digital Transformation)

Thane, India

- Engineered full-stack Python business applications using MVC architecture; developed FastAPI endpoints for portfolio media processing and secure backend storage.
- Optimized frontend performance, achieving a **40% improvement** in website load speed through automated WebP asset pipelines and lazy loading.

PROJECTS

AI Customer Support Agent | Python, LangGraph, FastAPI, ChromaDB, Docker

- Built a Python/FastAPI agent using LangGraph and ChromaDB to retrieve relevant information and automate customer query resolution.
- Developed evaluation tests covering retrieval quality, answer correctness, and common failure cases, using results to identify and refine system behavior.
- Implemented human review for sensitive actions and Docker-based deployment for reproducible development and testing.

AgentEd — AI-Powered Multi-Agent Study Assistant | Python, FastAPI, LangGraph, Pinecone, MongoDB Atlas, Backblaze

- Built a multi-agent study assistant using LangGraph and Pinecone that answers questions and generates summaries from user-uploaded course materials.
- Developed a FastAPI backend with JWT authentication and MongoDB for persistent session and conversation state.

Anantum — Offline AI Assistant | Python, Gemma 3 GGUF, Whisper, FAISS (HNSW), SQLite

- Built a fully offline AI assistant integrating speech recognition, semantic retrieval, local LLM inference, and tool execution using Gemma 3 GGUF, Whisper, FAISS, and SQLite.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Software Development: Python Automation, REST APIs, AsyncIO, FastAPI, Pydantic, Git

AI/ML: LLMs, RAG, LangGraph, LangChain, Tool Calling, Model Evaluation

Testing & Debugging: Evaluation Testing, Failure Analysis, Debugging, Troubleshooting

Data Processing: OCR, PDF Parsing, Async Workers, Queue Processing, Semantic Chunking, Metadata Extraction

Infrastructure: Docker, AWS (EC2, S3), Linux, Redis

EDUCATION

Mumbai University

Mumbai, India

Bachelor of Technology in Computer Engineering — CGPA: 8.68/10

2022 – 2026

CERTIFICATIONS

CS50 Python | Harvard University (edX)

Oracle Cloud and AI Associate | Cloud Infrastructure and AI Foundations

LangChain & Vector Databases in Production | ActiveLoop
